

Leora Events

DEMO ENVIRONMENT

Accounts, help guide and operations manual

Who can sign in, what each person can do on the site, and how the team runs the marketplace day to day: vendors, bookings, money, disputes and the server.

Every demo password: LeoraDemo2026!

CONTENTS

What is in this guide

1. **Getting started** — the eight accounts to show first, and the shared password.
2. **All demo accounts** — staff, 37 vendors and 24 couples.
3. **Help guide for couples** — planning a wedding on Leora, step by step.
4. **Help guide for vendors** — listing, bookings, getting paid.
5. **Help guide for admins** — the daily routine and every admin page.
6. **How the money moves** — held payments, release, refunds, commission, gifts.
7. **Running the server** — deploy, seed, settings and safety.

About this data. Everything you see on the demo site was created by `npm run seed:demo`. The businesses, couples and guests are fictional; the photos are real, freely licensed pictures from Wikimedia Commons, credited on the site's **Photo credits** page. Dates are counted from the day the seed runs, so one couple always marries "today".

1 · GETTING STARTED

The accounts to show first

Sign in at **/login** and pick the tab that matches the account (Couple, Vendor or Admin). All accounts share one password: **LeoraDemo2026!**.

Role	Email	What to show
Admin	`admin@leora.demo`	The admin console: approvals, payments, payouts, disputes, reports.
Support	`support@leora.demo`	Staff account with the Support role (fewer permissions than Admin).
Couple	`hana@leora.demo`	Hana & Dawit, planning: bookings, budget, 170+ guests, boards, messages.
Partner	`dawit@leora.demo`	The same wedding from the second partner's login (shared workspace).
Couple	`selam@leora.demo`	Selam & Yonas, marrying on the day you seed: live invitation, gifts, photo wall.
Partner	`yonas@leora.demo`	Selam & Yonas from the groom's login.
Vendor	`mesk@leora.demo`	Mesk Studio (photography): requests to answer, held and released money, reviews.
Vendor	`entoto-grand-hall@leora.demo`	Entoto Grand Hall (venue), on the Featured plan.

A ten-minute demo tour

1. **Homepage** → live vendor counts, top vendors with photos, testimonials. Switch to አማርኛ in the header.
2. **Marketplace (/vendors)** → filter by free date, guests and budget; open **Mesk Studio**: reviews with vendor replies, "usually replies within", booking terms.
3. **Sign in as hana@** → the dashboard (Ethiopian and Gregorian dates, fasting-season hint, milestones), Bookings (held money, deposit, "mark as delivered"), Guests, Inspiration boards.
4. **Open /i/selam-and-yonas** → the invitation of the couple marrying today: "Happening now / Next", the gift form.
5. **Sign in as mesk@** → new requests to answer, the 30-day funnel, money on hold vs available, Reviews.
6. **Sign in as admin@** → Overview charts, "Needs attention", approve the two pending vendors, a dispute, payout requests, gift payouts.

2 · ALL DEMO ACCOUNTS

Staff

Account	Email	Access
Leora Admin	admin@leora.demo	Super admin: every admin page and action.
Support Desk	support@leora.demo	Support role: day-to-day pages without the money-moving actions an Admin has.

Vendors

One login per business. “Terms” is the cancellation policy and the deposit a couple pays to book.

Lidya & Haile	`lidya-haile@leora.demo`	Adama	Married 380 days before	Free	—

> Guests do not have accounts: each guest has a personal invitation link (`/i/<couple>/<token>`), which the couple copies from **Guests** or **Invitation card**. That link is their RSVP, their QR entry pass, and their way into blessings, songs and the photo wall.

For couples

Everything lives under **Planning** (the `/wedding` area) once you sign in.

1. Set up

- **Couple details**: your names and contacts.
- **Wedding**: date, city, guest count and budget. Dates can be picked on the Ethiopian or Gregorian calendar; you will see a note if the date falls in a fast (Advent, Lent, Filseta…), Ramadan, peak season or the rains.
- **Plan together** (on Couple details): copy the link and send it to your partner. They sign up or sign in and join the same workspace.

2. Find vendors

- **Marketplace**: filter by category, city, rating, the date they are free, guest count and budget. “Use my wedding details” fills the date and guests.
- Save vendors (heart) and compare them under **Saved vendors**.
- Tap **Save** on any vendor photo to keep it in **Inspiration**; share a board with a vendor as a link.
- Message vendors on Leora. Phone numbers are shared once a booking is confirmed.

3. Book and pay

- **Request booking** from a vendor page; the vendor confirms or sends a quote you can accept.
- Pay the **deposit** to secure the date, then the balance by the due date (you get reminders). Pay with Chapa (telebirr, CBE Birr, cards) or bank transfer with a receipt.
- Your money is **held by Leora** until the service is delivered. After the event, tap **Mark as delivered**; if something went wrong, use **Report a problem** instead.
- Cancelling shows the refund under the vendor’s policy before you confirm.

4. Guests and invitations

- **Guests**: add guests, sides and tables; each gets a personal link with RSVP and a QR entry pass.
- **Invitation card** (Golden or Platinum): theme, photo, message, RSVP deadline; publish when ready.
- **Events**: one click adds the wedding week (Shimgilina to Kelekel).
- **Seating**, **Tasks** and **Budget** keep the rest on track.
- **Check-in**: on the day, scan guests’ QR passes at the door.

5. On the day and after

- The invitation shows “Happening now / Next” to guests.
- **Gifts**: turn on money gifts; guests send them with a blessing. Mark gifts thanked and ask for a transfer to your account.
- **Guestbook**: print the photo-wall QR for the tables, open the slideshow on the hall screen, copy the song list for the DJ, hide anything you’d rather not show.
- Leave a review for your vendors when Leora asks.

Ask Leora

The assistant (bottom left) answers in English or Amharic. Signed in, it reads your own plan: “What’s left to book?”, “Are we over budget?”, “Write a message to our caterer”.

For vendors

The vendor portal is at `/vendor-dashboard`.

Your listing

- **Business profile**: description, city, price range, the largest party you can serve, and your **booking terms**: cancellation policy (Flexible, Moderate, Strict), deposit %, and how many days before the event the balance is due.
- **Services** with photos and prices, and **Packages** with what is included.
- **Availability**: block the days you are not free; confirmed bookings block themselves.
- The **Verified** badge is given by Leora after checking your trade licence and ID.

Bookings

- New requests arrive in **Bookings** and as notifications. **Confirm** (with the agreed price), send a **quote**, **reschedule** or **cancel**.
- Cancelling a confirmed booking refunds the couple in full.
- Completed bookings are locked; contact support if something is wrong.
- **Messages**: contact details are hidden until a booking is confirmed, so the deal is made (and paid) on Leora.

Getting paid

- Couples pay through Leora. Your share (after commission) is **on hold** until the couple confirms delivery, or automatically three days after the event with no problem reported.
- **Payments** shows money on hold and money available. Ask for a **payout** to your bank or mobile money; Leora sends it and marks it done.
- When a couple cancels, they get back what your policy says; the rest is released to you.

Growing

- **Dashboard**: profile views, saves, inquiries and bookings for the last 30 days.
- **Reviews**: reply publicly to every review, especially a bad one.
- Reply quickly: your listing shows “usually replies within…”.
- **Plan**: Featured puts you at the top of the marketplace.

For admins

The admin console is at `/admin`. Start every day on **Overview** → **Needs attention**.

Daily routine

1. **Receipts to review. Payments** → **To review**: compare each bank-transfer receipt with the bank statement, then confirm or reject it with a reason the payer will see.
2. **Vendors awaiting approval. Vendors**: open the listing, approve or reject (the vendor is emailed). Bulk approve works on the list.
3. **Open disputes. Disputes**: read both sides, set Under review, then Resolved (or Refunded) with notes. Held money stays frozen while a dispute is open.
4. **Refund requests. Payments** → **Refunds**: approve or reject. On approval send the money back through Chapa or by transfer; the vendor's share is taken back from their wallet.
5. **Payout requests. Payouts**: mark Processing, send the money, then Complete with the bank reference (this debits the wallet).
6. **Gift payouts. Gift payouts**: transfer couples' gift money and mark it sent with the reference.
7. **Messages. Messages**: the public contact form; mark read or replied.

Every admin page

Page	What it is for
Overview	Revenue, bookings, sign-ups, plan mix and what needs attention.
Reports	Revenue, growth and vendor performance for any date range, with CSV export.
Users	Every account; change a role; ban (signed out everywhere) and unban.
Vendors	Approve, reject, suspend. Open a vendor for its plan, money, bookings, reviews, disputes, and the **Mark verified** button (only after checking the trade licence and the owner's ID).
Bookings	All bookings and the money on hold for each. **Release funds** pays a vendor early, for example the deposit kept on a cancelled booking. Pending bookings can be cancelled here.
Payments	Plan and booking payments, receipts to review, "Check with Chapa" for a stuck online payment, refunds.
Payouts / Gift payouts	Sending vendors their earnings and couples their gifts.
Disputes	Problems raised by couples or vendors on a booking.
Reviews	Remove a review that breaks the rules; the vendor's rating is recalculated.
Subscriptions	Plan prices and features, and who is subscribed.
Coupons	Discount codes for plan checkout.
Messages	Contact-form inbox.
Activity log	Every admin change, who made it and when.
Settings	Commission rate and the bank accounts couples transfer to.

4 · HOW THE MONEY MOVES

Payments, holds and releases

1. Couple pays
Chapa, or a transfer receipt that staff confirm.

2. Commission
Leora keeps its commission (10% in the demo, set in Settings).

3. On hold
The vendor's share waits in "on hold".

4. Released
When the couple marks delivered, or 3 days after the event with no open dispute.

5. Payout
The vendor asks; staff send it and complete the payout.

Cancellation policies

Policy	Couple cancels…	Refund
Flexible	7 days or more before the event / later	100% / 50%
Moderate	30 days or more / 7–29 days / less than 7 days	100% / 50% / none
Strict	60 days or more / later	50% / none
Any	The vendor cancels	100%

- A cancellation raises the refund automatically for staff to pay out; what the vendor keeps is released once the refund is settled.
- A refund on money still on hold comes out of the hold; on released money it comes out of the vendor's available balance.
- Open disputes and pending refunds freeze the release until staff settle them.
- **Gifts** are paid through Chapa into Leora's account and sent to the couple on request. `GIFT_FEE_PERCENT` sets Leora's share (0 by default).
- **Plans**: couples need Golden or Platinum to publish an invitation. Vendors list for free; set `REQUIRE_VENDOR_PLAN=true` to list only paying vendors and enforce each plan's booking limit.

5 · RUNNING THE SERVER

Deploying the demo

1. **Create the database** (utf8mb4) and set the environment variables below.
2. **Migrate:** `npm run db:migrate`
3. **Load reference data:** `mariadb -u USER -p DB < database/seed.sql`
4. **Seed the demo:** `npm run seed:demo` — prints every login. Run it on the day you want "today's wedding" to be.
5. **Build and start:** `npm run build`, then run the Node server behind nginx or Caddy with HTTPS.
6. **Re-seed later** with `npm run seed:demo -- --reset` (wipes every account, booking and payment, then seeds again).

Settings that matter

Variable	Demo value	What it does
`DATABASE_URL`	your database	MySQL / MariaDB connection.
`ORIGIN`	https://your-domain	The public address (needed for sign-in and payment returns).
`BETTER_AUTH_SECRET`	a long random string	Signs sessions.
`REQUIRE_STAFF_2FA`	`false`	In production staff must set up two-step sign-in; turn it off for the demo admin.
`CHAPA_SECRET_KEY`	test key	Use Chapa's test key on the demo so no real money moves.
`CHAPA_WEBHOOK_SECRET`	from Chapa	Verifies Chapa's payment callbacks.
`SMTP_*`	optional	Email. Without it, emails are only logged.
`GEMINI_KEY`	optional	Turns on the "Ask Leora" assistant.
`BODY_SIZE_LIMIT`	`12M`	Lets receipt and wall photos upload.
`RUN_JOBS`	`true`	Background jobs (payment checks, plan expiry, releasing held money, reminders). Only one process.
`REQUIRE_VENDOR_PLAN`	`false`	Vendors list for free while off.
`GIFT_FEE_PERCENT`	`0`	Leora's share of wedding gifts.

Before showing it to anyone outside the team: the demo password is printed in this guide, so treat the demo as public. Never point the seed at a database with real customers, keep Chapa on the test key, and change the admin password if the demo stays online.
